Map Notice Board	
Point of Interest	
Trailhead Kiosk w/ map: for major trail access points	
Special Requests: provide details below	

CFPA Trail Signage

Trailhead signs – All trailheads on the Blue-Blazed Hiking Trail System should have a sign to assist the hiker in locating the trail. This trail sign, fastened to post or tree, may be in addition to a notice board or kiosk in a parking area. Signs must include trail name and the BBHT Oval. Signs may also include directional arrows, mileage, and points of interest.

-Trail Identification Sign

-Trail Mileage Sign

Signs can also be used at confusing trail intersections or junctions. However, if more than one sign is required to clarify trail name, location, or direction, consider use of a small map notice board. Notice boards are ideal for loop or multi trail intersections or other permanent information. Materials displayed in standard notice boards are restricted to 8 ½ x 11 inches and 8 ½ x 14 inches.

Kiosks are to be used in parking areas with a minimum capacity of four vehicles. Kiosks contain a large laminated poster (30" +/- x 23 inches) of the trail map, icons for approved trail use, Leave No Trace guidelines, CFPA description, a QR code, and other information about the area (other organizations, land trusts etc). Kiosks may also have a CFPA brochure box mounted on the side. Additional space below the poster is provided for other information. Before posting other information, consult with the sign committee/CFPA Trails Stewardship Director.
