Restore bonding for Connecticut's Recreational Trails & Greenways Program

The CT Recreational Trails & Greenways Program has invested \$10 million since 2016 into 60 municipal and nonprofit grants and multiple State Park and Forest projects in more than half of all communities across the state.

CFPA recommends that at least \$3 million in bonding be authorized now or else DEEP will have no more matching grants available for creating, improving, or maintaining Connecticut's amazing recreational trails.

There is still significant need for these grants, with a large remaining backlog of requests. More than \$12 million in funding requests were submitted in October, 2018 for the last \$3.17 million in bonding available. More than \$4 million in highly-ranked project proposals could not be funded in the last grants round, but here is the [DEEP press release on those projects that were selected for funding](#).

Why is restoring bonding so important?

- Recreational trails are one of the best ways that bond funds can be invested. Recreational trails for hiking, running, biking, equestrian, and other uses attract and sustain families and businesses, create healthy communities, and foster a high quality of life.
- In Connecticut, outdoor recreation generates \$9 billion in consumer spending, \$2.2 billion in wages and salaries in the private sector, \$502 million in state and local tax revenues, and supports 71,000 Connecticut jobs and much of this outdoor recreation is associated with using trails.
- Connecticut's recently updated State Comprehensive Outdoor Recreation Plan (SCORP) for 2017-2022 commissioned statewide surveys that ranked recreational trails at the very top of community assets and needs for the future.
- Connecticut leads the nation every year in the number of trail events held on CT Trails Day weekend. One of the reasons, of course, is the public's great interest in exploring the state through its trails.
- If restored, this bonding would be the **only** source of funding available in 2019-20 that could be invested in a wide variety of recreational trail projects around the state. Crucially, these funds can go where federal dollars cannot – such as planning, design, and smaller but critical connections to various state trails networks.

To ensure Connecticut will remain a trails leader, this important and economically significant investment in Connecticut's quality of life must be renewed in 2019. **CFPA recommends a bond authorization of at least \$3 million.**
